P R E F A C E

Under the Registration of Births and Deaths Act 2021 (RBDA 2021)¹, the Registry of Births and Deaths has been charged with the responsibility of registering all live births, stillbirths and deaths in Singapore.

The Report on Registration of Births and Deaths, 2023 is the 36th publication in the annual series by the Registry. The Report aims to provide an overview of the annual changes in the population, births, deaths and other vital statistics². The statistical tables and charts on vital statistics will be of interest to academics, demographers and medical professionals. Specimen certificates of and procedures for the registration of births, stillbirths and deaths have been included in the annexure.

The Registry of Births and Deaths gratefully acknowledges the assistance and contribution of the Ministry of Health, the Department of Statistics, the Singapore Police Force and all other agencies in the publication of this Report.

**REGISTRAR-GENERAL OF BIRTHS AND DEATHS
SINGAPORE**

July 2024

¹ On 29 May 2022, the RBDA 1937 was repealed and the RBDA 2021 was enacted.

² The births and deaths statistics in this Report are based on the registrations under the RBDA 2021.

Singapore

Registration of Births and Deaths 2023

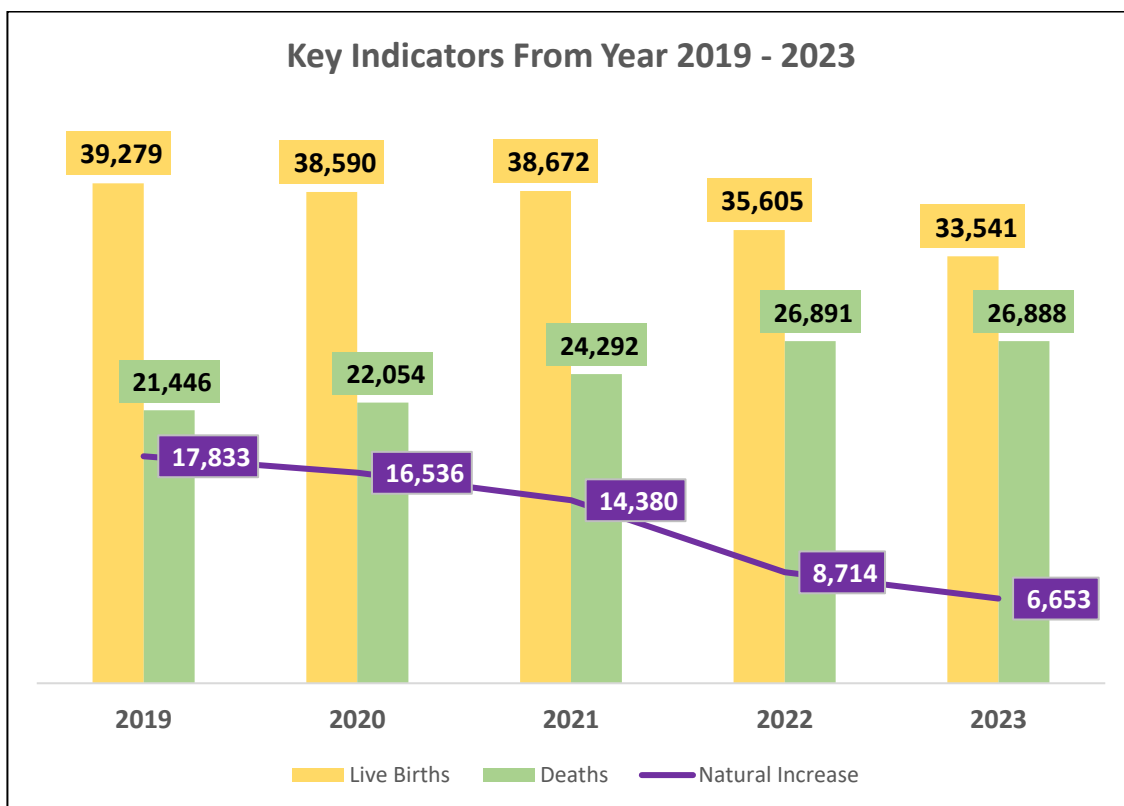

Summary

33,541 (5.8%) ↓
Live Births

26,888 (0.01%) ↓
Deaths

145
Stillbirths

In 2023, there were 33,541 occurred live births, 26,888 registered deaths, and 145 registered stillbirths. Compared to 2022, live births decreased by 5.8% and registered deaths decreased by 0.01%.

Note: Percentage figures used in the report may not add up to 100 percent due to rounding.

Key Indicators

Table I: Key Indicators

	2014		2021		2022		2023	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
Natural Increase	22,839	5.1	14,380	2.7	8,714	1.6	6,653	1.2

Deaths	19,393	4.7	24,292	5.8	26,891	6.3	26,888	6.2
Chinese	14,666	4.9	18,511	6.1	20,384	6.6	20,178	6.4
Malays	2,755	5.0	3,297	5.9	3,828	6.6	3,899	6.7
Indians	1,510	3.5	2,031	4.9	2,105	4.9	2,201	4.9
Others	462	1.9	453	2.5	574	2.5	610	2.6
Infant Mortality	83	1.8	78	1.8	69	1.8	86	2.2
Neonatal Mortality	50	1.1	51	1.1	41	1.1	48	1.1
Perinatal Mortality	123	2.9	114	2.9	140	3.9	175	5.2
Stillbirths	86	2.0	78	2.0	110	3.1	145	4.3

Note 1: Infant mortality refers to death of persons under one year of age. Crude infant mortality rate refers to the number of infant deaths per thousand live births. From 1980 onwards, this rate is based on resident live births only.

Note 2: Neonatal mortality refers to death of persons under 28 days of age. Crude neonatal mortality rate refers to the number of neonatal deaths per thousand live births. From 1990 onwards, this rate is based on resident live births only.

Note 3: Perinatal mortality refers to deaths of infants under one week of age and stillbirths. Please note the revised definition of stillbirths as outlined in explanatory notes 22. Crude perinatal mortality rate refers to the number of perinatal deaths per thousand live births and stillbirths.

Note 4: For more information, please refer to explanatory notes on page 29 - 30.

General

The Immigration & Checkpoints Authority (ICA) administers the Registration of Births and Deaths Act 2021 (RBDA 2021). On 29 May 2022, the RBDA 1937 was repealed and the RBDA 2021 was enacted. Under this Act, all live births, deaths, and stillbirths occurring within Singapore are required to be reported within the stipulated period. Prior to enactment of the RBDA 2021, the Registry also re-registers births under the Adoption of Children Act.

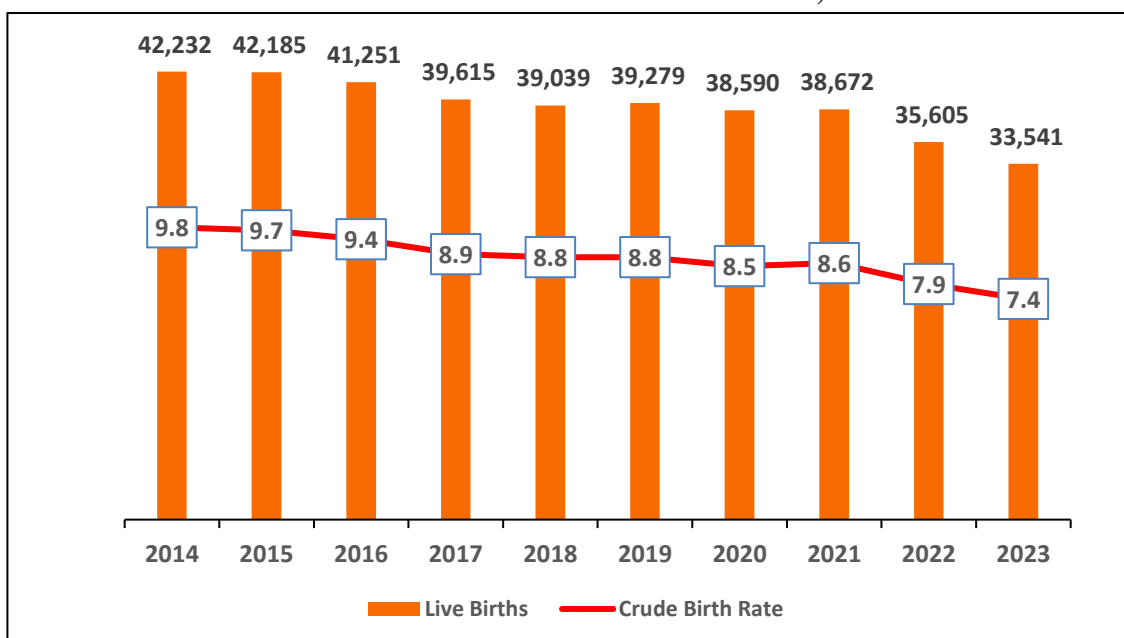

2 In 2023, there were 33,541 occurred live births, 26,888 registered deaths and 145 registered stillbirths. There were 8 cases of live births registered after 42 days from occurrence. In this report, date of occurrence is adopted for the compilation of births statistics while date of registration is adopted for deaths statistics.

3 Under the Adoption of Children Act, the birth of a child shall be registered under the RBDA upon an Adoption Order issued by the Court. If the child's birth had previously been registered under the RBDA, the name of the child, as well as the names and other particulars of the adoptive parents, as recorded in the Adoption Order, are entered in the birth register in place of the natural or last adoptive parents of the child. In 2023, 278 children were adopted and registered/re-registered under the RBDA.

Live Births

4 In 2023, there were 33,541 live births, reflecting a 5.8% decline from the previous year's count of 35,605. The crude birth rate, calculated at 7.4 per 1,000 Singapore residents, was lower than the rate observed in 2022 (Chart 1).

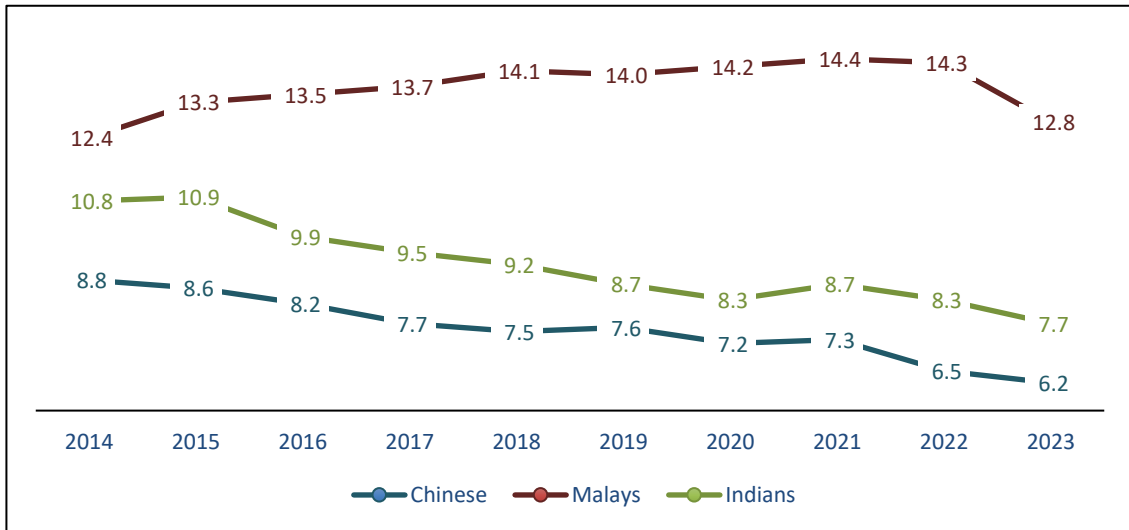

Chart 1
LIVE BIRTHS AND CRUDE BIRTH RATES, 2014 – 2023

5 Out of the total newborns in 2023, Chinese newborns accounted for 57.4% (19,258), Malays for 21.5% (7,212), Indians for 11.4% (3,821), and individuals of other races for 9.7% (3,250). In 2023, Malays had the highest birth rate, with 12.8 per 1,000 residents, followed by Indians with 7.7 per 1,000 residents. Chinese had the lowest rate at 6.2 per 1,000 residents (Chart 2).

Live Births

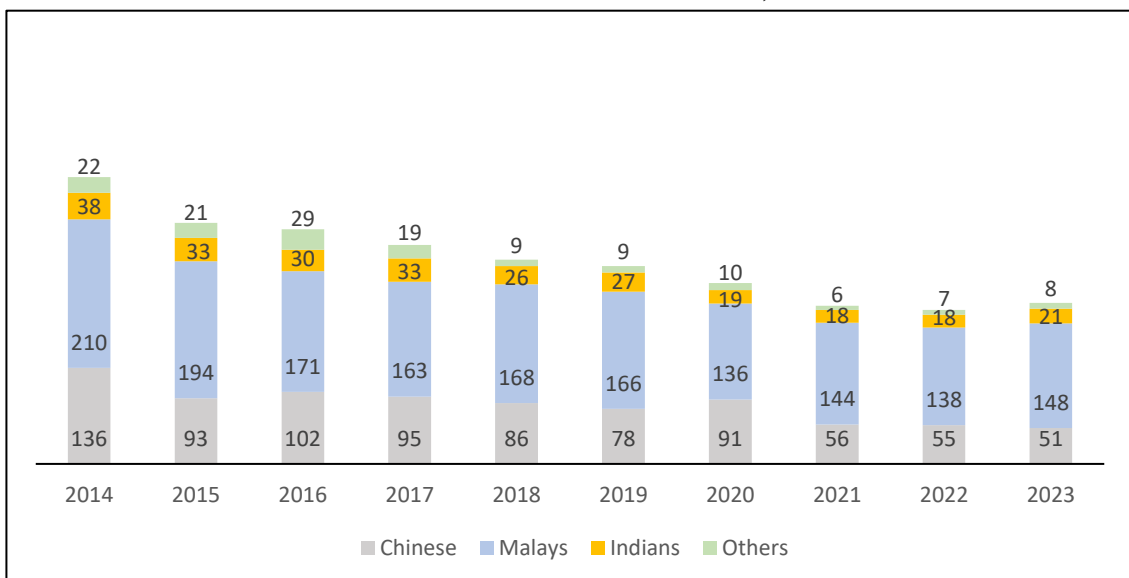

Chart 2
CRUDE BIRTH RATE BY ETHNIC GROUP, 2014 – 2023

Teenage Births

6 In 2023, the number of live births among teenagers aged 19 and below was 228, showing a 4.6% increase compared to the 218 births recorded in 2022. By proportion, 22.4% of teenage births were born to Chinese, 64.9% to Malays, 9.2% to Indians and 3.5% to other ethnic groups.

Chart 3
TEENAGE BIRTHS BY ETHNIC GROUP, 2014 – 2023

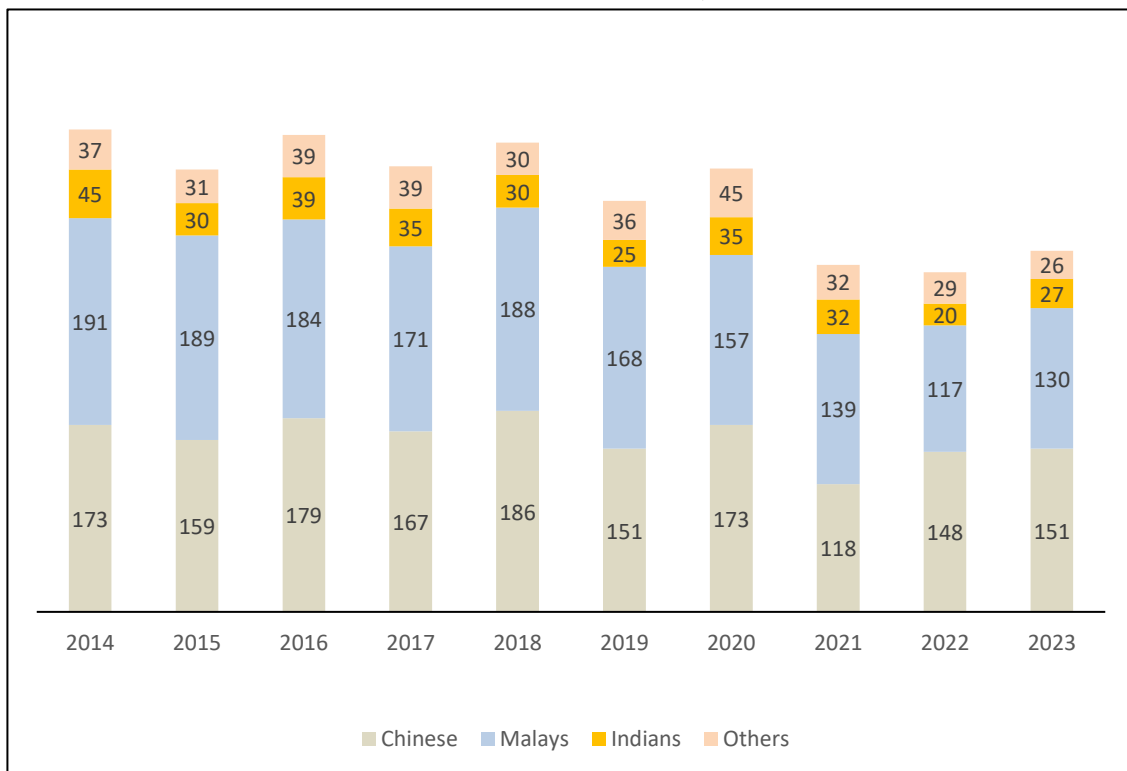

Live Births

Single-Parent Birth Registration (SP Birth)

7 In 2023, a total of 334 live births were registered without the father’s name (Chart 4). Of these 334 SP births, 80 (24.0%) births were born to teenagers aged 19 and below.

8 Chinese made up the largest proportion of SP birth in 2023. 45.2% of SP births were born to Chinese, 38.9% to Malays, 8.1% to Indians and 7.8% to other ethnic groups.

Chart 4
SP BIRTH BY ETHNIC GROUP, 2014 – 2023

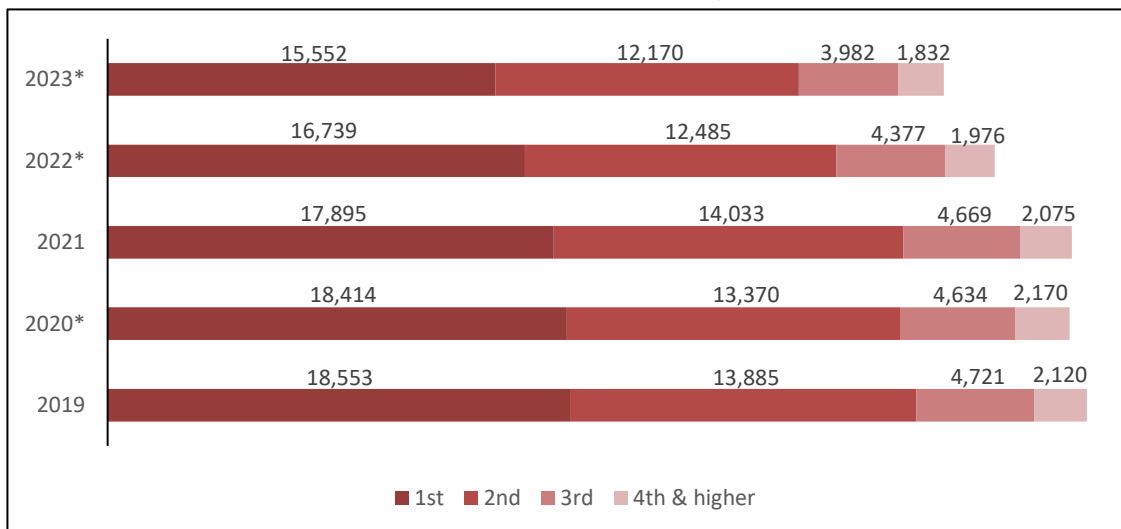

Birth Order

9 In 2023, the distribution of live births was as follows: 46.4% were 1st order births, 36.3% were 2nd order births, 11.9% were 3rd order births, and 5.5% were 4th and higher order births (Chart 5).

Live Births

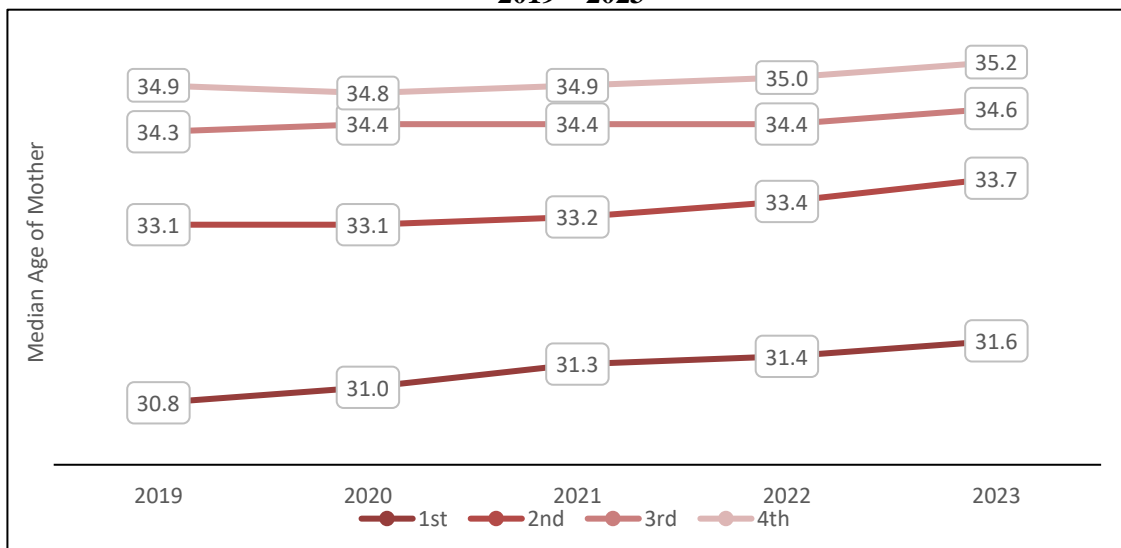

Chart 5
LIVE BIRTHS BY BIRTH ORDER, 2019 – 2023

* Year 2020 had 2 counts of unknown births order, Year 2022 had 28 counts of unknown births order, Year 2023 had 5 counts of unknown births order. For births registered from 29 May 2022 onwards, birth order statistics are based solely on declared information.

10 An analysis of resident birth order data reveals a clear trend of first-time mothers progressively delaying childbirth to later stages of their lives. The median age of first-time mothers rose from 30.8 years in 2019 to 31.6 years in 2023. The median age of mothers giving birth to their third or subsequent child has shown minimal change over the same period (Chart 6).

Chart 6
RESIDENT BIRTH ORDER BY PERIOD AND MEDIAN AGE OF MOTHER, 2019 – 2023

Live Births

First-Time Mothers

11 In 2023, the median age of first-time mothers among resident live births was 31.6 years at the time of giving birth. Among specific ethnic groups, Chinese mothers typically have their first child at the age of 32.4 years, Malay mothers at 28.4 years, and Indian mothers at 30.3 years. Mothers from other ethnic groups have a median age of 31.9 years when having their first child.

12 Among these first-time mothers, 65.5% had university degrees and 34.5% had 'A' level / Diploma / ITE or lower qualification.

Live Births

Type of Birth and Period of Gestation

13 In 2023, there were 32,623 single births, 894 twin births, and 24 triplet births.

14 Among single births, the most common gestation period observed was 38 weeks, comprising 34.9% of all single births. Twin births, on the other hand, predominantly occurred at 37 weeks, constituting 33.1% of the total number of twin births. Premature single births, defined as those with a gestation period of 36 weeks or less, amounted to 2,180 cases, making up 6.7% of all single births. Among twin births, a significant proportion of 60.9% consisted of premature deliveries with a gestation period of 36 weeks or less.

Table III

Live Births

Birth Weight

15 Chart 7 reflects a strong tendency that twin births were generally lighter in weight than single births.

Chart 7
SINGLE AND TWIN LIVE BIRTHS
BY BIRTH WEIGHT, 2023

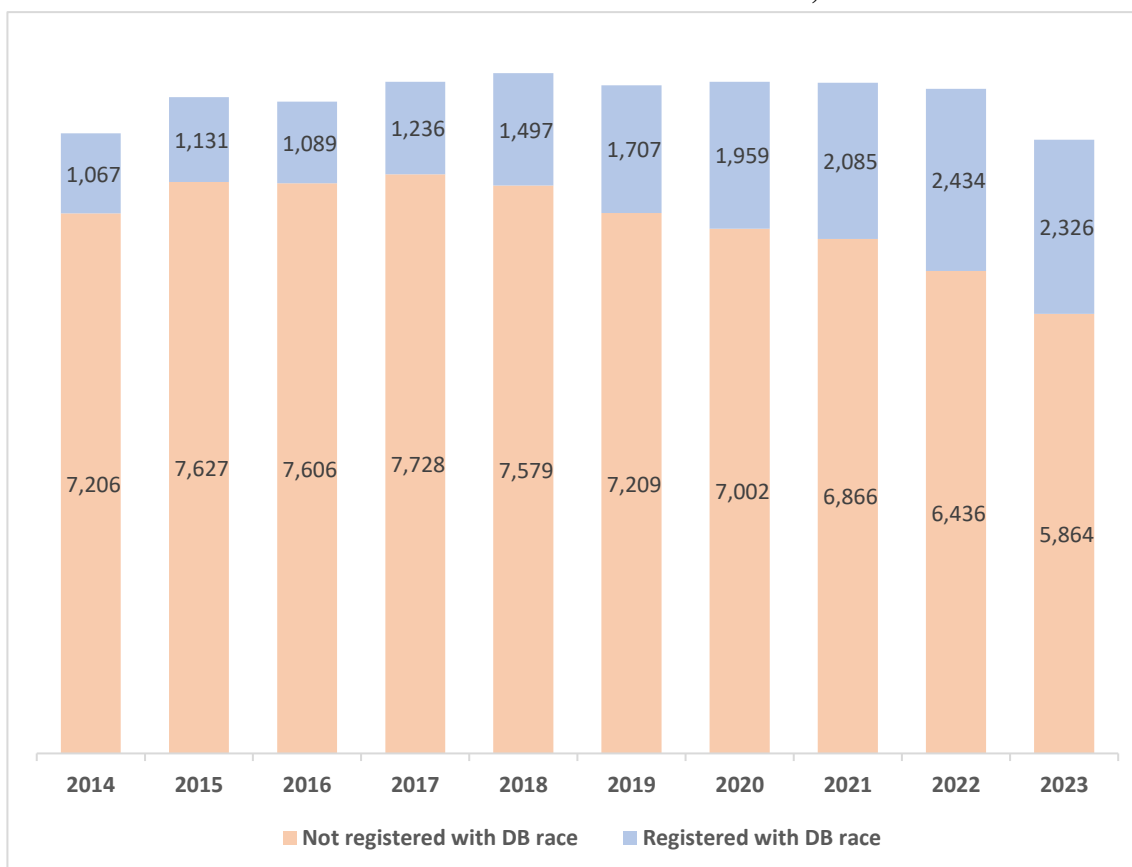

Live Births

Double-Barrelled (DB) Race Registration

16 In 2023, there were 8,190 babies of mixed parentage³. Among these, 2,326 babies were registered with DB race (Chart 8). The proportion of babies with mixed parentage born each year and registered with DB race has increased over the years, from 12.9% in 2014 (1,067 of 8,273 babies of mixed parentage) to 28.4% in 2023 (2,326 of 8,190 babies of mixed parentage).

Chart 8
NUMBER OF BABIES OF MIXED PARENTAGE, 2014 – 2023

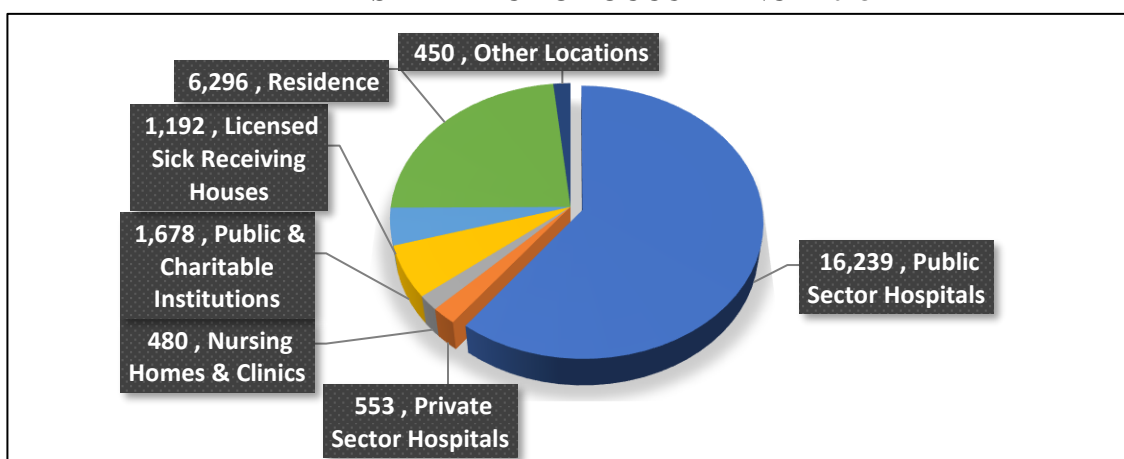

³ This refers to babies born to parents with different races of either same CMIO group (intra-CMIO) or different CMIO groups (inter-CMIO).

Deaths

17 In 2023, the total number of registered deaths reached 26,888, indicating a decrease of 3 cases compared to the 26,891 deaths registered in 2022.

18 The combined percentage of deaths that occurred within both public and private hospitals accounted for 62.5% of the total fatalities. Of the total deaths, 23.4% occurred in residences, 8.0% were in nursing homes and charitable institutions, 4.4% were in sick receiving houses and 1.7% at other locations.

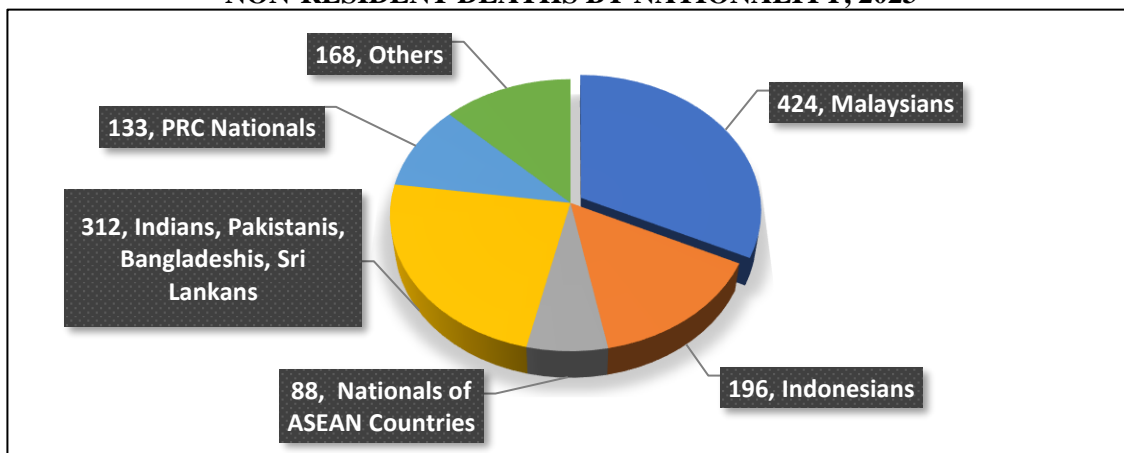

Chart 9
DEATHS BY PLACE OF OCCURRENCE 2023

Nationality

19 4.9% of deaths registered in 2023 were non-residents⁴ (Chart 10). They were mostly Malaysians and Indonesians.

Chart 10
NON-RESIDENT DEATHS BY NATIONALITY, 2023

⁴ Non-residents include work pass holders, dependants pass, student pass, tourist, and short-term visitors.

Deaths

Major Causes of Death

20 In 2023, the leading causes of death were heart & hypertensive diseases and lung & respiratory system diseases, collectively accounting for 50.8% of all registered deaths. Additionally, malignant neoplasm and cerebrovascular diseases were prominent factors, responsible for 24.6% and 5.6% of death cases, respectively. Unnatural causes such as accidents, suicides, and other external causes, constituted 2.3% of the total cases.

Chart 11A

MAJOR CAUSES OF DEATH IN 2022

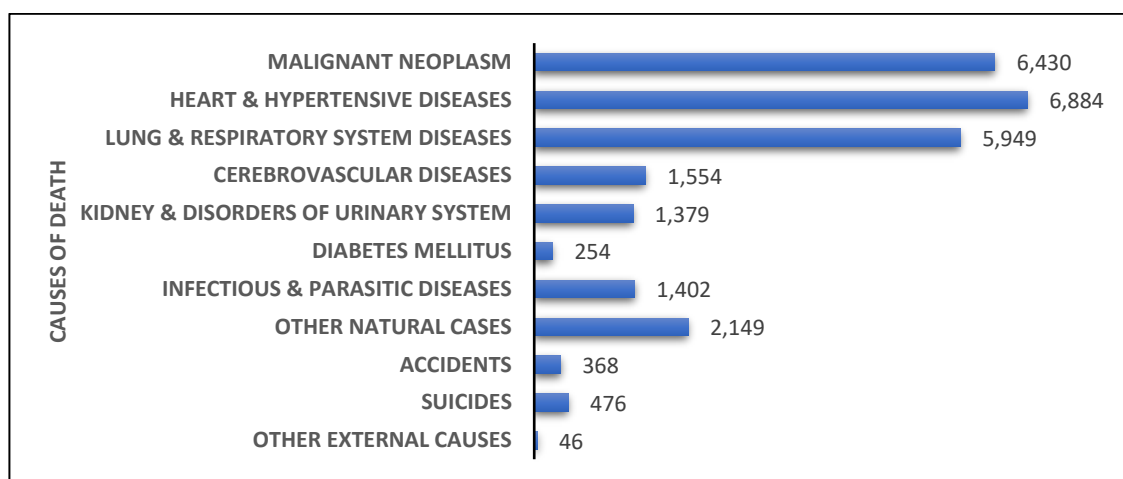

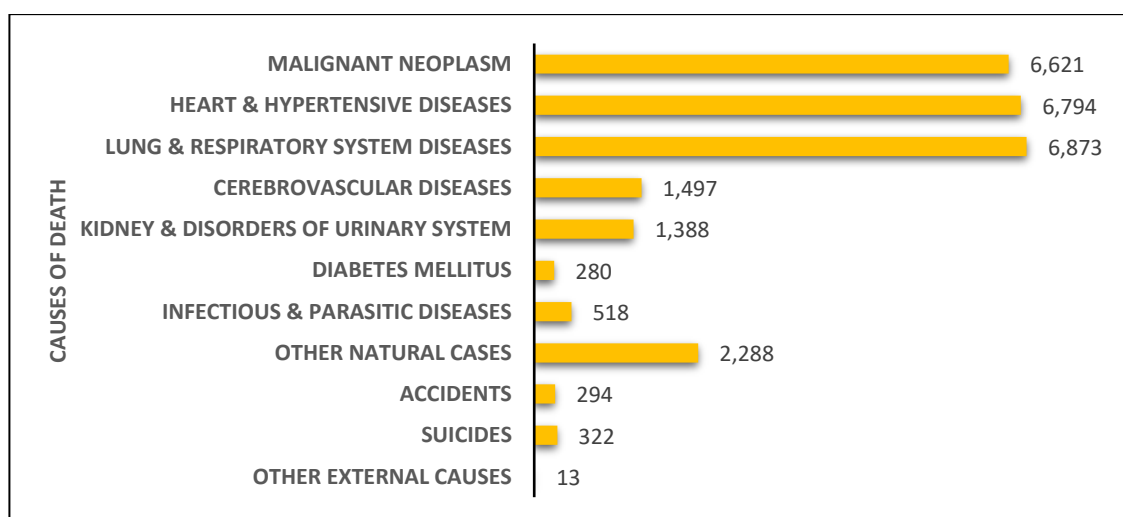

Chart 11B

MAJOR CAUSES OF DEATH IN 2023*

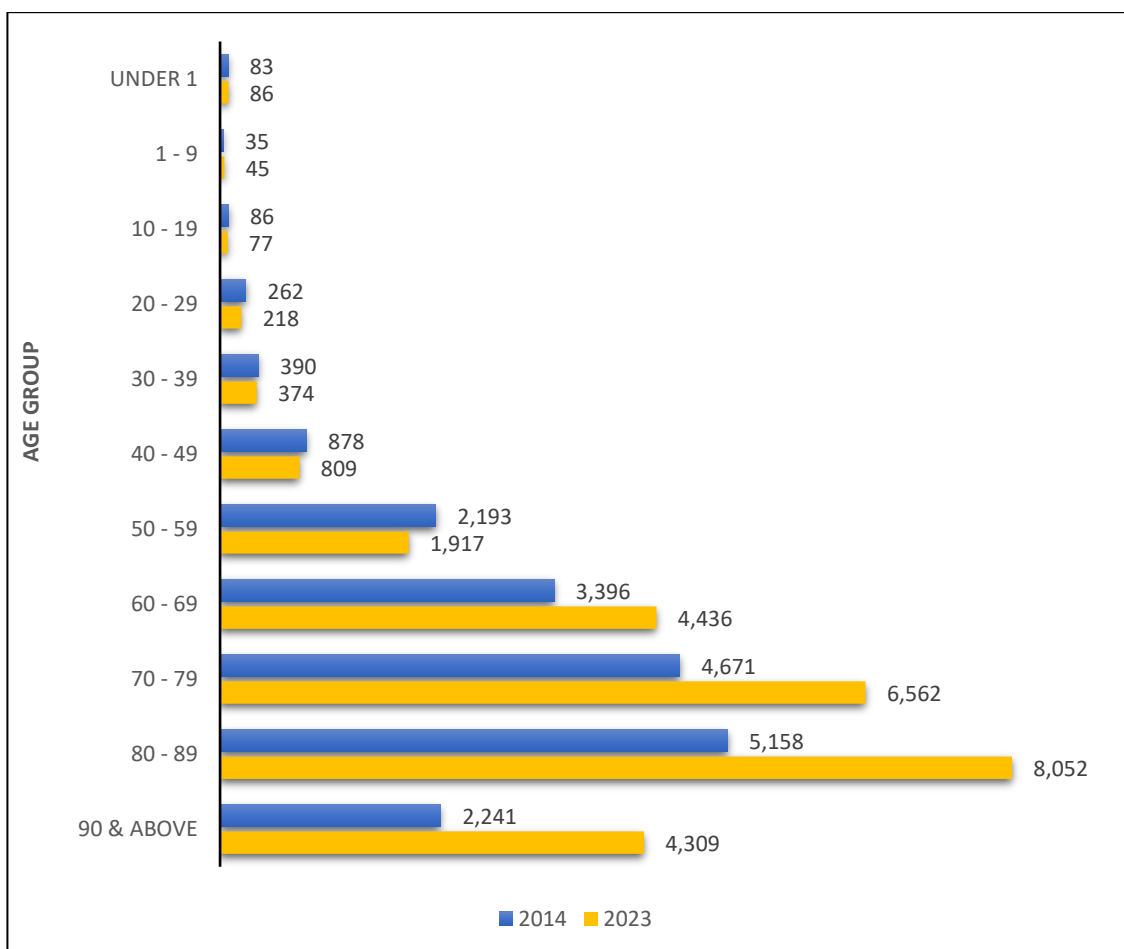

* Figures for 2023 are provisional. The finalised figures will be published in the following year's report.

Deaths

Median Age at Death and Sex

21 In 2023, three death cases had an unknown age recorded. The majority of deaths, totaling 23,359 persons, were aged 60 years and above, making up 86.9% of the total. Persons between the ages of 50 and 59 accounted for 7.1% of all deaths. Furthermore, there were 86 reported cases of infant deaths (age under one year old), representing 0.3% of the overall death count (Chart 12).

Chart 12
DEATHS BY AGE GROUP, 2014 and 2023

22 In terms of 2023 mortality, males surpassed females, with a ratio of 1,207 males per 1,000 females. When examining the causes of death across sex, it was observed that males had a higher proportion of deaths attributed to heart and hypertensive diseases, as well as accidents. Conversely, females exhibited a higher proportion of deaths associated with kidney and disorders of urinary system, as well as cerebrovascular diseases (Chart 13B).

Deaths

Chart 13A
MORTALITY IN 2022 BY SEX AND CAUSES OF DEATH

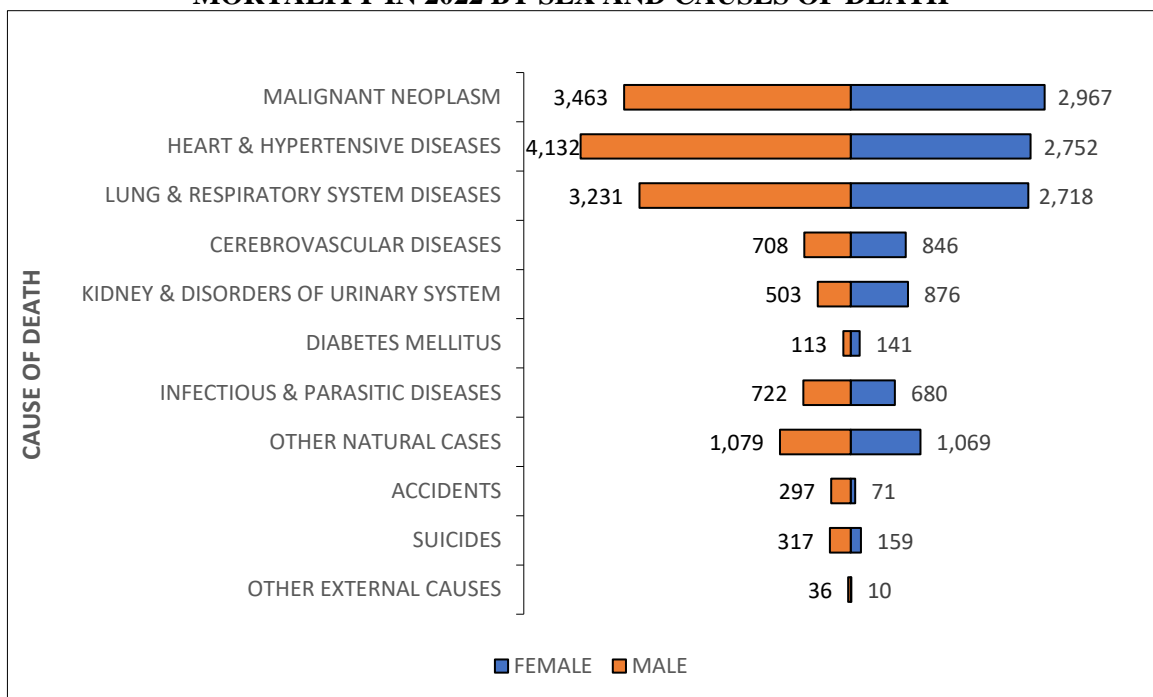

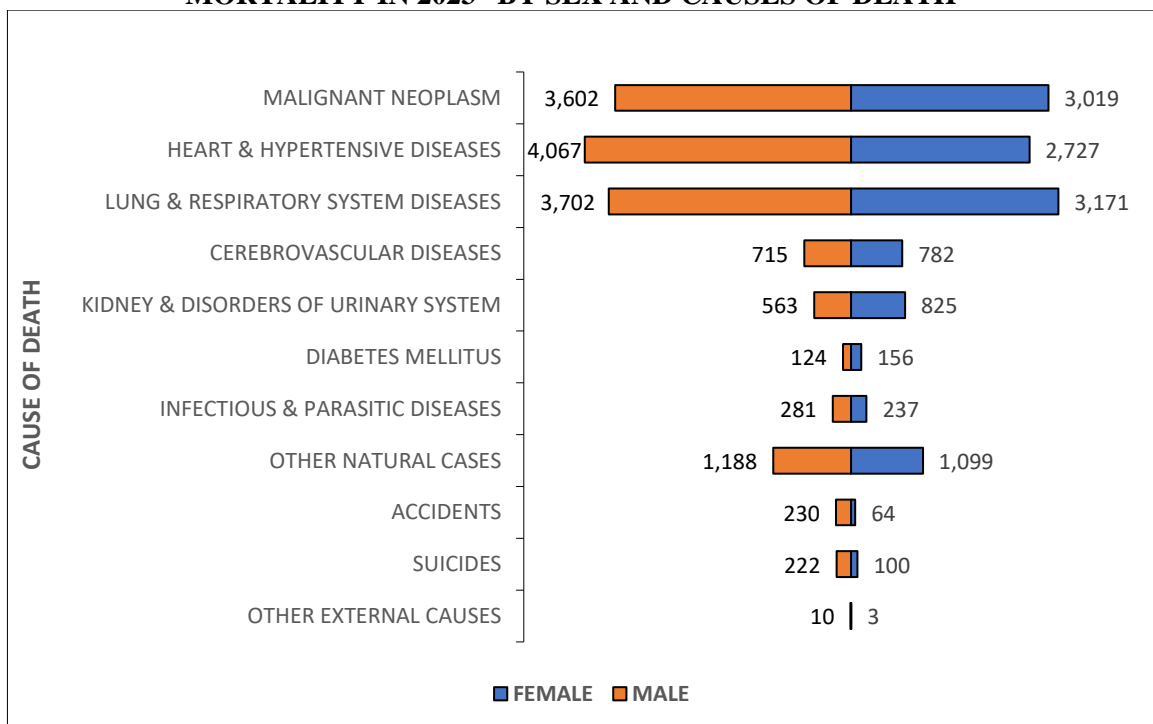

Chart 13B
MORTALITY IN 2023* BY SEX AND CAUSES OF DEATH

* Figures for 2023 are provisional. The finalised figures will be published in the following year's report.

Deaths

23 The median age (MA in short) at death was 78.3 years in year 2023. The highest MA of 84.5 years was recorded for those who died of lung & respiratory system diseases, followed by 82.6 years for kidney & disorders of urinary system and 81.2 years for Infectious & Parasitic Diseases.

24 The MA has been gradually increasing over the years. It was 75.5 years in 2014. It increased to 76.7 years and 78.3 years in 2018 and 2023 respectively. Not including other natural causes, the increase in MA was most conspicuous among infectious & parasitic diseases (67.7 year in 2014 to 81.2 year in 2023).

25 Females tend to live longer than their male counterparts. The MA was 75.1 years for males compared to 82.8 years for females, a difference of 7.7 years (Table IV).

Deaths

* Figures for 2023 are provisional. The finalised figures will be published in the following year's report.

Deaths

Ethnic Group

26 75.0% of deaths registered in 2023 were Chinese while Malays, Indians and other ethnic groups made up of 14.5%, 8.2% and 2.3% of death cases respectively (Chart 14B).

Chart 14A
MORTALITY IN 2022 BY ETHNIC GROUP AND CAUSES OF DEATH

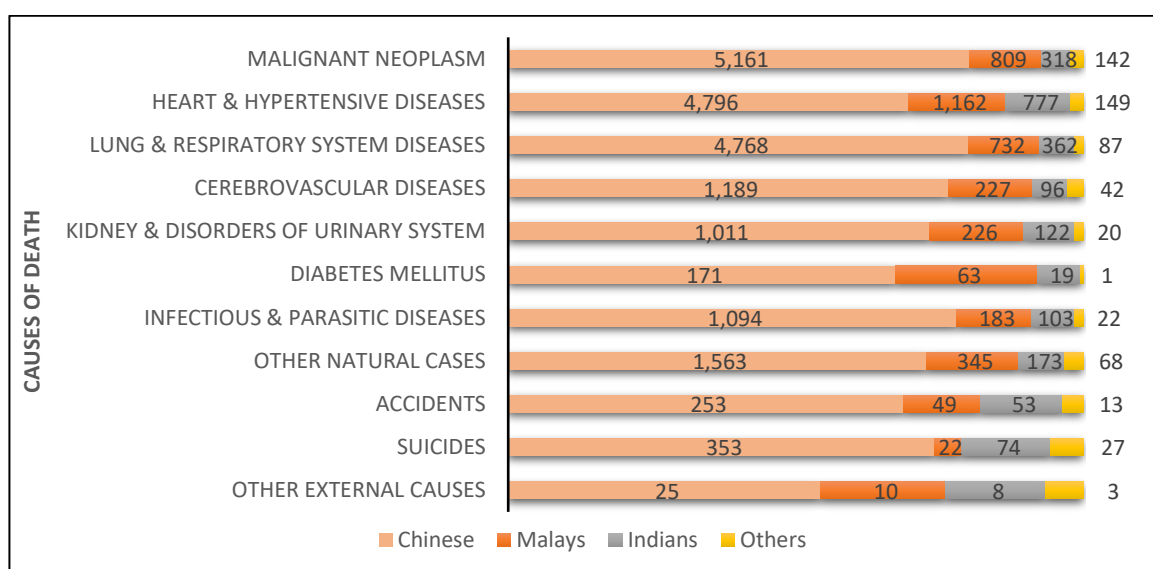

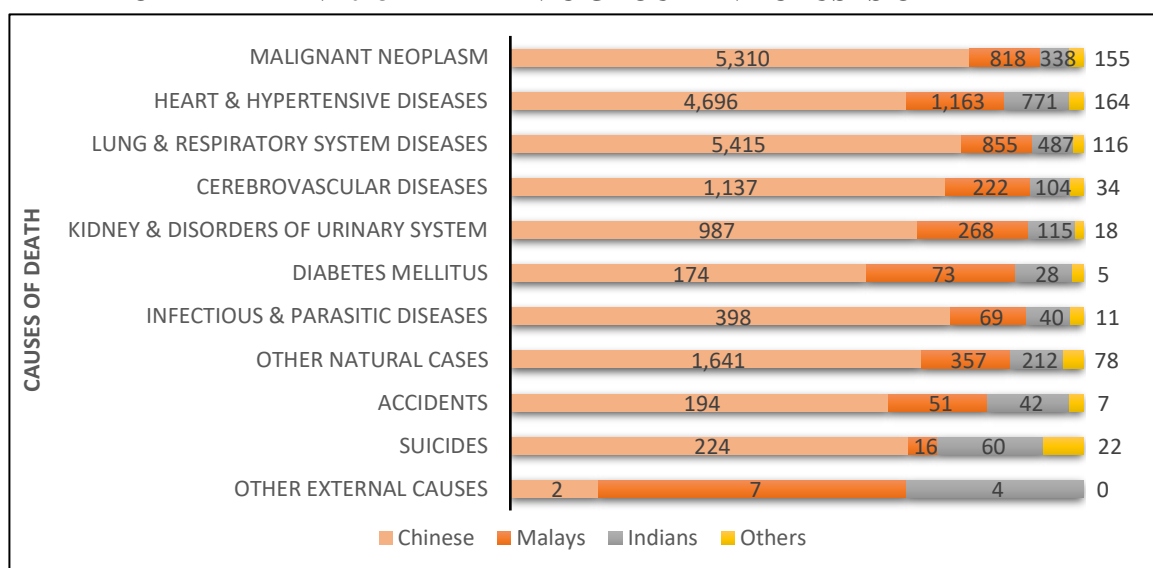

Chart 14B
MORTALITY IN 2023* BY ETHNIC GROUP AND CAUSES OF DEATH

* Figures for 2023 are provisional. The finalised figures will be published in the following year's report.

Deaths

27 Table V(II) shows that there were differences in the MA among different ethnic groups. The MA for Chinese was 80.3 years compared with 73.0 years for Malays, 72.3 years for Indians and 70.2 years for other ethnic groups. The gap in MA between Chinese and non-Chinese ethnic groups existed in most major causes of death.

* Figures for 2023 are provisional. The finalised figures will be published in the following year's report.

Deaths

Infant Mortality

28 Of the 86 infant deaths registered in 2023, 39 were males and 47 were females. The main causes of infant death were Perinatal Originated Conditions (31.4%) and Congenital Anomalies (20.9%). The infant mortality rate in 2023 was 2.2 per 1,000 resident live births (Chart 15).

Chart 15
INFANT MORTALITY RATES, 2014 – 2023

Neonatal Mortality

29 The number fell slightly from 50 in 2014 to 48 in 2023. The neonatal mortality rate in 2023 remained the same as 2014 at 1.1 per 1,000 resident live births.

Perinatal Mortality

30 Including stillbirths⁵, there were 175 perinatal deaths registered in 2023. The perinatal mortality rate was 5.2 per 1,000 live births and stillbirths.

Maternal Mortality

31 In 2023, there was 1 case of maternal death⁶ registered.

⁵ Please note the revised definition of stillbirths as outlined in explanatory notes 22.

⁶ Maternal mortality figure for 2023 is provisional. The finalised figures will be published in the following year's report in Table 1.

Stillbirths

32 In 2023, there were 145 registered stillbirths⁷. Chart 16 shows that the crude stillbirths rates varied between 1.9 to 4.3 per 1,000 live births and stillbirths for the last 10 years.

Chart 16
STILLBIRTHS RATES, 2014 – 2023

33 Stillbirths registered in 2023 comprised of 79 males, 64 females and 2 cases with an unknown sex. Among the registered stillbirths, those occurring between 22 to 27 weeks of gestation period constituted 46.2% of the total stillbirth cases.

⁷ Please note the revised definition of stillbirths as outlined in explanatory notes 22.

ANNEXURE

PROCEDURES FOR THE REGISTRATION OF LIVE BIRTHS, DEATHS AND STILLBIRTH

LIVE BIRTHS

All births in Singapore must be registered within 42 days from the date of birth. Effective from 29 May 2022, all parents of newborns are required to register their child's birth online via LifeSG.

2 A fee of S\$18.00 is payable for the birth registration and issuance of a digital birth certificate.

DEATHS

3 Effective from 29 May 2022, a death in Singapore will be automatically registered once a doctor certifies the death online. After the doctor has certified the death online, the next-of-kin can download the digital death certificate at My Legacy website. There is no fee for death registration and issuance of a digital death certificate.

STILLBIRTHS

4 Effective from 29 May 2022, a stillbirth in Singapore will be automatically registered once a doctor certifies the stillbirth online. After the doctor has certified the stillbirth online, parents can download the digital stillbirth certificate at My Legacy website. There is no fee for stillbirth registration and issuance of a digital stillbirth certificate.

EXPLANATORY NOTES

EXPLANATORY NOTES

- 1 *Resident population* refers to Singapore citizens and permanent residents.
- 2 *Annual population growth rate* refers to the annual population increase per thousand population, and is based on Singapore residents only.
- 3 *Sex ratio* refers to the number of males per thousand females and is based on Singapore residents only.
- 4 *Natural increase* refers to the excess of births over deaths.
- 5 *Crude rate of natural increase* refers to the natural increase per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 6 A *live birth* refers to a child, irrespective of the duration of gestation, which after the complete expulsion or extraction from the mother, breathes or shows any other signs of life. From 1953 onwards, the figures are based on date of occurrence. Prior to 1953, they are based on date of registration.
- 7 *Crude birth rate* refers to the number of live births per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 8 *Birth order* refers to the numerical order of a child in relation to all previous live births of the mother. For births registered from 29 May 2022 onwards, birth order breakdowns are based solely on declared information.
- 9 Statistical breakdown by *educational qualification* and *occupation* of parents are based solely on declared information.
- 10 *Period of gestation* refers to the number of weeks a baby remained in the mother's womb before birth.
- 11 A *premature birth* refers to a birth with less than 37 weeks of gestation.
- 12 A *death* refers to the permanent disappearance of all signs of life of a living person at any time. Death figures referred to the number of deaths registered during the year.
- 13 *Crude death rate* refers to the number of deaths per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 14 *Infant mortality* refers to death of persons under one year of age.

- 15 *Crude infant mortality* rate refers to the number of infant deaths per thousand live births. From 1980 onwards, this rate is based on resident live births only.
- 16 *Neonatal mortality* refers to death of persons under 28 days of age.
- 17 *Crude neonatal mortality rate* refers to the number of neonatal deaths per thousand live births. From 1990 onwards, this rate is based on resident live births only.
- 18 *Perinatal mortality* refers to stillbirth and death of persons under seven days of age.
- 19 *Crude perinatal mortality rate* refers to the number of perinatal deaths per thousand live births and stillbirths.
- 20 *Maternal mortality* refers to deaths of mothers owing to deliveries and complications arising from pregnancy, childbirth and puerperium.
- 21 *Crude maternal mortality rate* refers to the number of maternal deaths per hundred thousand live births.
- 22 A *stillbirth* is defined under RBDA 2021 as a child that issues from the child's mother after the twenty-second week⁸ of pregnancy and does not show any sign of life at any time after being completely expelled or extracted from the mother. Stillbirth figures referred to the number of stillbirths registered during the year.
- 23 *Crude stillbirth rate* refers to the number of stillbirths per thousand live births and stillbirths.
- 24 *Resident live births* refer to those with at least one parent who is Singapore citizen or permanent resident.
- 25 An *abandoned child* refers to a child whose local birth registered without the information of both parents.
- 26 From 2023 onwards, statistical breakdown by *cause of death* for current year's report is provisional. The finalised figures will be published in the following year's report.

⁸ Before 29 May 2022, a stillbirth is defined under RBDA 1937 as any child which has issued forth from its mother after the 28th week of pregnancy and which did not at any time after being completely expelled from its mother breathe or show any other signs of life.
